## "SCC deviation from milk test report" window

The *"SCC deviation from milk test report"* window (*"Health SCC/OCC SCC deviation from milk test report"*) shows data from the last milk sampling. Only animals that meet at least one criterion in the *"SCC/OCC deviation settings"* window are included.

### "SCC deviation from milk test report"

Item	Description
<i>"Animal number"</i> :	Shows the animal that had its milk tested.
<i>"Animal name"</i> :	
<i>"Lactation"</i> :	Shows the animal's lactation number.
<i>"Days in milk"</i> :	Shows the animal's days in milk.
<i>"Last SCC"</i> :	Shows the animal's somatic cell count (SCC) value during the last milk test.
<i>"SCC cow contribution"</i> :	Shows how much the bulk tank SCC value would be reduced if the animal is replaced with an animal that has an average SCC value.
<i>"SCC -1"</i> :	Shows the animal's SCC value during the previous milk test.
<i>"SCC -2"</i> :	Shows the animal's SCC value during the milk test before the previous milk test.
<i>"Yield last milking"</i> :	Shows the animal's milk yield during the session the milk sample was taken.
<i>"Milk test yield"</i> :	Shows the amount of milk that was tested.
<i>"Milk test date"</i> :	Shows when the milk was tested.
<i>"Yield ECM"</i> :	Shows the animal's energy-corrected milk yield (kg or pounds).
